

Tasker

powered by **servicenow**™

Imagine zero missed deadlines and 100% organization engagement

Simple and secure task management

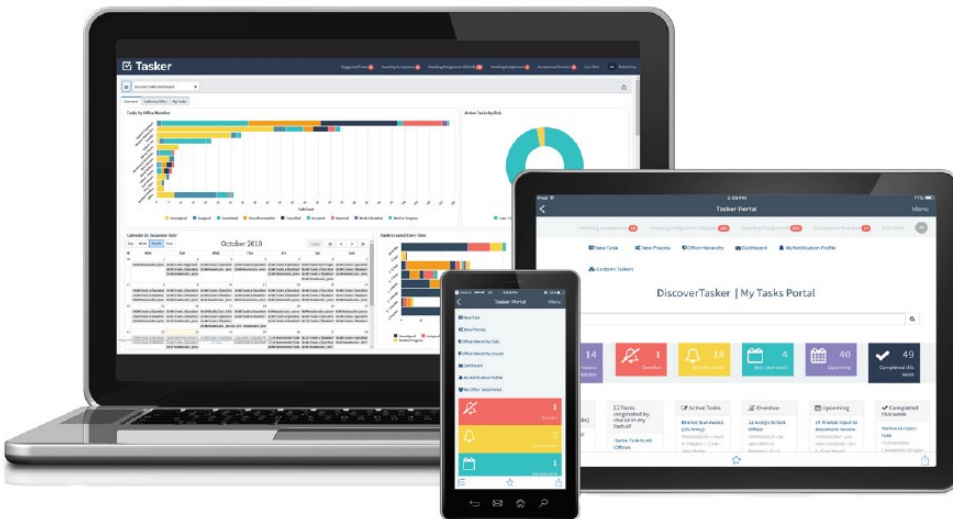

Provide total visibility and accountability with real-time reporting for all users across all departments within the organization.

Custom tasks and processes

Assign tasks from top-down or bottom-up. Many tasks and processes cross departments or silos. The Tasker application was engineered to handle these complexities.

Plug and play without leaving the Platform

Tasker is powered by ServiceNow®, a trusted Federal and Commercial PaaS provider- minimum code required and immediate Authority to Operate (ATO).

Drive productivity

- Clear task tracking
- Automated notifications
- Real-time task reporting

Make better decisions

- Easy task management
- Flexible ad-hoc taskings
- Real-time communication
- One click task escalation
- Custom processes

Reduce costs

- Scheduled / unscheduled taskings
- Access SharePoint with DocIntegrator plugin
- Top-down tasking
- Bottom-up tasking

Federal Use Cases

- Monthly / Weekly Activity Reporting
- Controlled Correspondence Tracking
- Application Decommission and Archival
- Major Defense Acquisition Programs (MDAP)

"This team has a tenacious attention to detail, an overwhelming desire for perfection and an unprecedented pursuit to be a strategic partner for all those they work with."

Derek Neal

ServiceNow Account Executive

Modernized end-to-end task management

Tasker interface showing a task management workflow. The workflow includes stages: New, Unassigned, Assigned, Accepted, Work in Progress, and In Review. The current task is 'TASK0100016: Crossing the Delaware'. The interface shows a 'Top Secret' classification, a 'Standard' tasker type, and various action buttons like 'Update', 'Cancel Task', 'Request Extension', 'Request Reassignment', and 'Send to Review'. A sidebar on the right provides details for the task, including the assigned member (Abigail Fillmore), reviewer (George Washington), and various dates and statuses.

Real-time task tracking for better decisions

Built for all industries
