

DocGenerator

powered by servicenow™

On-demand document creation with real-time data from ServiceNow

Enterprise-wide template management

Create on-demand documents and reports from any information stored in ServiceNow®. Standard and custom templates are available to all users across all departments within the organization.

Standardize or customize for recipients

Mitigate risk and reduce costs by delivering the definitive document with the right requirements and accurate data the first time. Reuse the template for standardization.

Plug and play without leaving the platform

DocGenerator is powered by ServiceNow, a trusted Federal and Commercial PaaS provider- minimum code required and immediate Authority to Operate (ATO).

Seamless data integration on prem or in the cloud

Content merge function allows users to click and consolidate data

Users can upload and merge files from their own library, including CSV, PDF, XML, XSLX, DOC

Build using quick start wizard

Click to request tokens, select and verify data fields

Consolidate with content merge and select file type

Publish with one click

Reuse and save for later
