

DocIntegrator

powered by servicenow™

Browser-based editing, document versioning, and multi-user editing in the platform

Manage everything in one place

No need to switch back and forth between applications. Add documents directly to SharePoint from any ServiceNow® table. Retrieve and edit documents inside ServiceNow. Save time, collaborate better, and keep a single source of truth.

- Association of managed content
- Document viewing and editing
- Content versioning and editing
- Edit documents inside ServiceNow

Plug and play without leaving the platform

DocIntegrator is powered by ServiceNow, a trusted Federal and Commercial PaaS provider- minimum code required and immediate Authority to Operate (ATO).

Use SharePoint for all application documents

DocIntegrator enables ServiceNow cases, incidents, and tasks to reference managed content in SharePoint

View and edit SharePoint documents and metadata without leaving the context of your ServiceNow solution

Track version history and restore or view a previous version of a SharePoint document within ServiceNow

Add documents directly to SharePoint from any ServiceNow app, or replace ServiceNow table attachments

Stay in SharePoint without leaving the ServiceNow platform
