powered by servicenow™

## Automatic Document Creation with Real-time Data from ServiceNow®

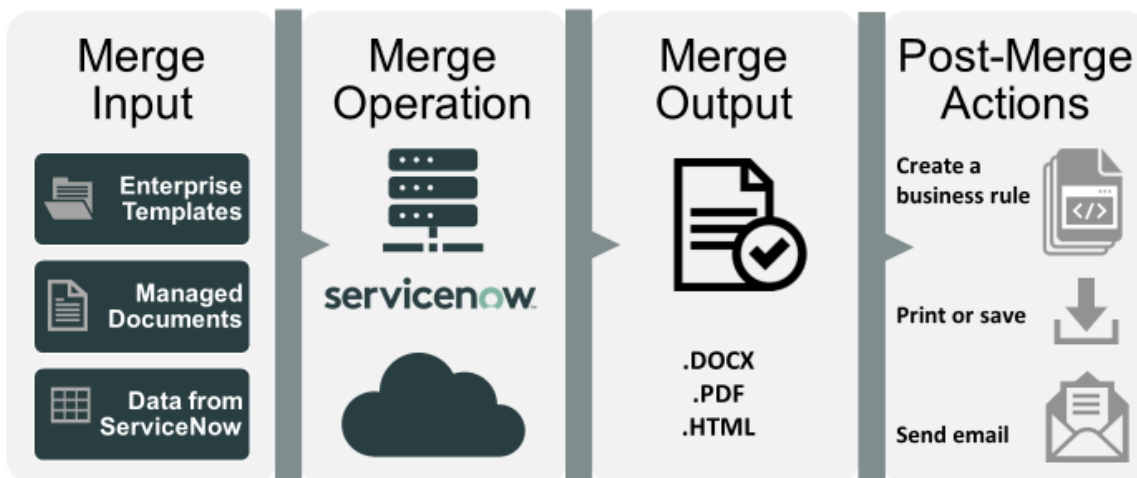

### Manage everything in one place

Enterprise-wide template management and document creation in ServiceNow. Deliver the definitive document the first time and every time. Save time, collaborate better, and keep a single source of truth.

- Create documents with any information stored in ServiceNow.
- Standardize and store approved templates in the Managed Documents plugin.
- Identify document fields and prepare the template with the help of the quick start wizard.
- Enable click-to-fill documents for any ServiceNow table with real-time information stored in the platform.

### Plug and play without leaving the platform

- Powered by ServiceNow, DocGenerator is certified and available in the ServiceNow App Store.
- Download, deploy, and maximize your ServiceNow technology investment with configuration, not code.

- Use DocGenerator for all enterprise or Agency documents
- Support on-premise, hybrid, and cloud environments
- Upload and merge file types: PDF, HTML, DOCX
- Click and consolidate data in reusable templates
