

# DocGenerator

## Product Overview

## Discover the Modern Way to Create Documents

Built on Now, DocGenerator enables document creation using real-time data from anywhere inside the ServiceNow platform to increase productivity and mitigate risk. Generating recurring or repetitive documents such as monthly reports, official correspondence, and benefits enrollment forms is tedious and error prone. User entered incorrect information causes delays, misunderstandings, or can even lead to poor decisions. Productivity suffers and risks increase. Modernize the way your organization creates documents with DocGenerator.

**Built on**

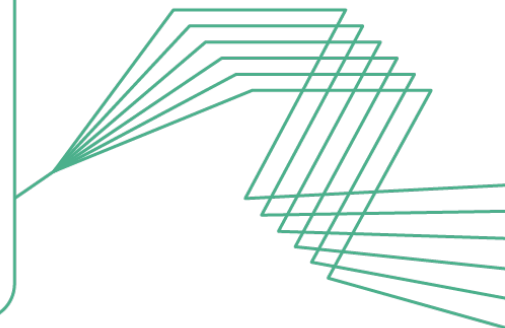

The screenshot shows the 'Document Generation Template Wizard' in the ServiceNow interface. The current step is 'Map fields', which involves mapping data from a table to a document template. The interface includes a progress bar with steps: 'Choose a Table', 'Select File', 'Map fields', 'Review Template', and 'Validate Template'. The 'Map fields' step is active.

To Merge Field	Mapping Field Type	From Table	From Field
assigned_to.name	Simple Mapping	u_speedway_data_form [adv]	u_assigned_to.name
assigned_to.title	Simple Mapping	u_speedway_data_form [adv]	u_assigned_to.title
consumer.city	Simple Mapping	u_speedway_data_form [adv]	u_consumer.city
consumer.first_name	Simple Mapping	u_speedway_data_form [adv]	u_consumer.first_n
consumer.last_name	Simple Mapping	u_speedway_data_form [adv]	u_consumer.last_n
consumer.state	Simple Mapping	u_speedway_data_form [adv]	u_consumer.state
consumer.street	Simple Mapping	u_speedway_data_form [adv]	u_consumer.street
consumer.zip	Simple Mapping	u_speedway_data_form [adv]	u_consumer.zip
number	Simple Mapping	u_speedway_data_form [adv]	u_consumer.mobil
u_today	Simple Mapping	u_speedway_data_form [adv]	u_consumer.sys_u

# Discover Automated Document Creation

## Discover increased productivity

Automate the creation of documents and reports, or easily and quickly create templates – without opening MS Word or Adobe. Save time inserting real-time data from anywhere in ServiceNow into templates. Share templates across the enterprise for on-demand use.

## Enhance collaboration

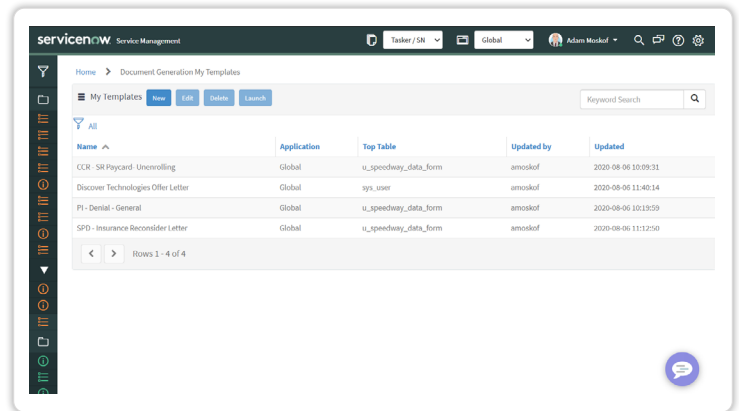

Enterprise-wide document template creation and management enables working on document templates together in real-time from ServiceNow or Tasker. Pull data from across ServiceNow applications. Easily create, edit, review, and approve templates. Get everyone on the same screen.

## Mitigate risk

Deliver the definitive document with the right requirements and accurate data – the first time every time. Managed templates reduce errors and ensure an enterprise-wide single source of truth for document creation using real-time data from ServiceNow. Easily create accurate reports, official correspondence, memos, personalized emails, and other documents.

## Save time and money to implement

Built on Now platform so it's affordable and quick to implement. Easy to configure, no coding required.

## Federal Use Cases

- Records Declassification
- Application Decommission and Archival
- Monthly/Weekly Activity Reports
- Freedom of Information Requests (FOIA)
- Major Defense Acquisition Programs (MDAP)
