

# DocIntegrator

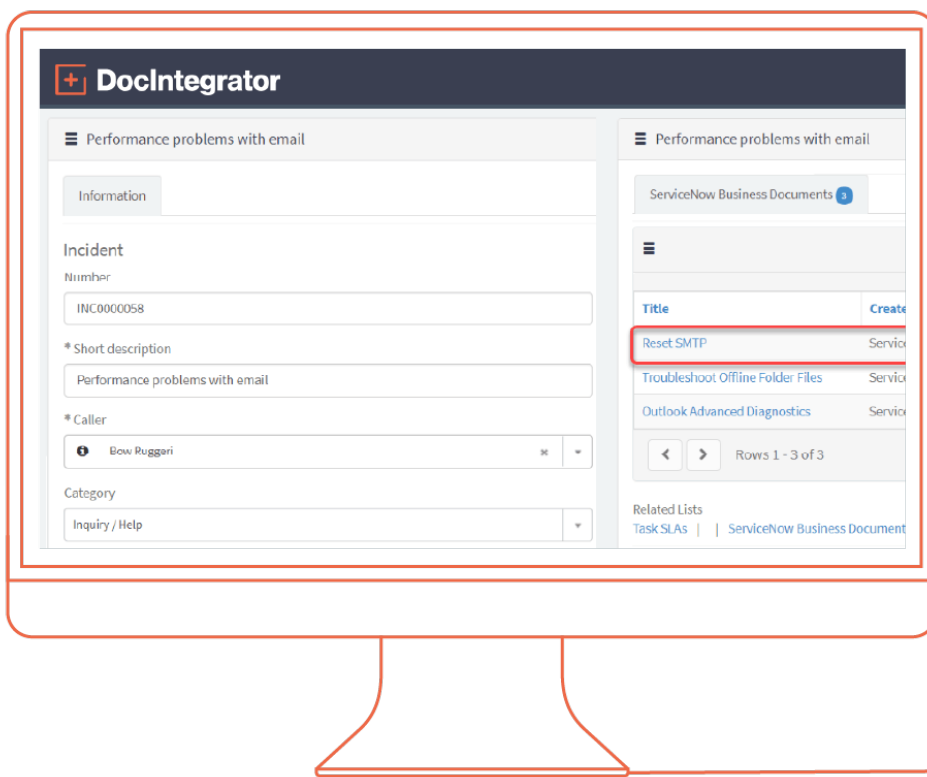

## Product Overview

## Discover Seamless Document Management

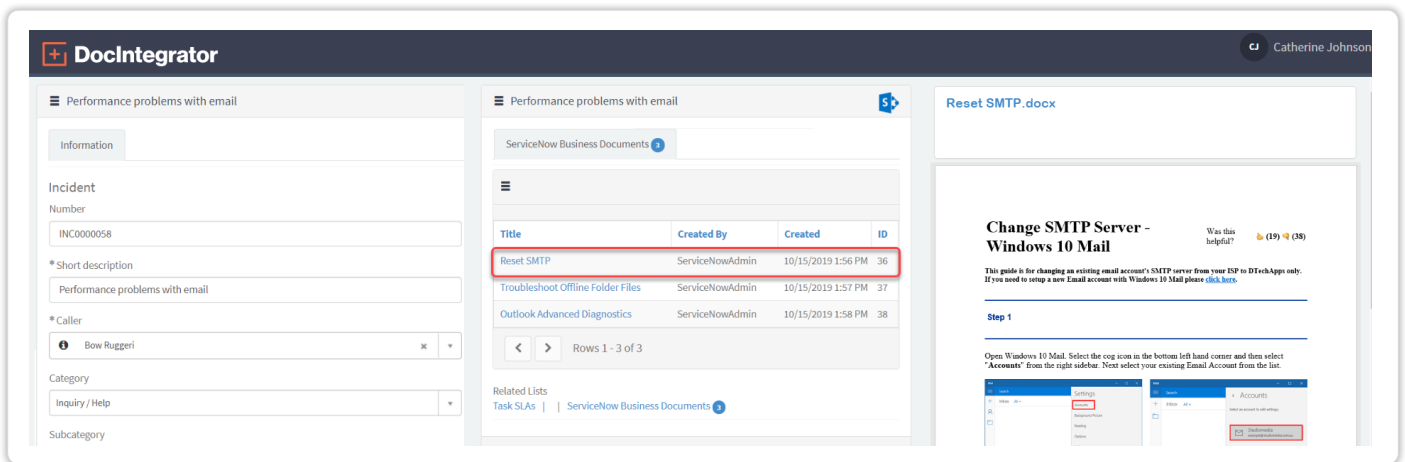

DocIntegrator, Built on Now, seamlessly integrates SharePoint with any ServiceNow application. Create, associate, collaborate, review and sign documents inside ServiceNow or Tasker – without ever going into SharePoint.

Managing documents between applications and outside of ServiceNow is time consuming and frustrating. The result: productivity declines, real-time collaboration is cumbersome, and document errors increase. Stop the status quo for document management across your enterprise by using DocIntegrator.

**Built on**

# Modernize Document Management

## Leverage your ServiceNow investment

Enables easy SharePoint document integration with other ServiceNow enterprise applications so you can manage workstreams and documents in one place. Associate and work with SharePoint documents in any ServiceNow application or Tasker.

## Discover increased productivity

Make working with SharePoint documents seamless without ever going to SharePoint.

- Find documents more quickly
- See all documents related to ServiceNow applications and tasks
- Edit without downloading and uploading
- Complete actions with a digital signature

## Enhance collaboration

Work on documents together in real-time inside ServiceNow or Tasker. Create, edit, review, and approve documents, even those in different SharePoint environments or site collections. Get everyone on the same screen.

## Save time and money to implement

Built on the Now platform so it's affordable and quick to implement. Easy to configure, no coding required.

## Enterprise document management without the cost

When used with Tasker, everyone can manage documents and content inside tasks, seamlessly and economically across the enterprise.
