The Tasker Suite

Discover How Productive Your Organization Can Be

Many organizations use legacy solutions for task management, document management and document creation such as email, spreadsheets, complex workflow software, and shared drives. But these solutions are cumbersome, disjointed and lack security.

The result: Your agency or business wastes time, tasks remain uncompleted, reports and correspondence are inaccurate. Most importantly, missing critical deadlines causes delayed outcomes and the inability to fulfill your mission and business goals.

Built on now.

About DTech Apps

Discover Technologies is an 11-year-old technology services and products company focused on helping organizations through their digital transformation journey. A few years ago, Discover Technologies recognized the challenges organizations experienced in modernizing office operations to become more efficient and successful. DTech Apps by Discover Technologies was born.

DTech Apps by Discover Technologies partnered with ServiceNow, the global leader in workflow management, to develop a suite of applications to help organizations deal with the challenges of assigning and managing tasks. The products enable organizations to spend more time achieving their objectives and less time managing their tasks. The result: development of The Tasker Suite, three products developed to help organizations discover how productive they can be.

Industries Served

Federal

We serve both civilian and defense agencies across the Federal government. With over a decade of experience helping Federal sector clients with enterprise application software, we understand your unique needs and requirements. Let us help you focus on your mission, not software.
