☑ Tasker

Product Overview

Manage Tasks the Modern Way with Tasker

Manage tasks instead of tasks managing you with Tasker, the only enterprise task management software Built on Now. Tasker is an easy to use and secure solution providing real-time insights so you can accomplish more and make better decisions faster.

Most Federal agencies, whether defense or civilian, and commercial businesses manage tasks using cumbersome solutions like email and spreadsheets, within teams and across the enterprise. But this is frustrating, wastes time and lacks security. The result: No transparency into who is doing what, when and how, missing deadlines, and not achieving your or your agency's mission or business goals.

Built on

now™

Modernize with Tasker – Stop the Status Quo

Make better decisions faster
Gain real-time visibility into work streams across your organization, who is doing what, and more. No more endless email searches, cumbersome spreadsheets, complex workflow software and shared drives. See tasks as you've never seen them before.

Maximize your ServiceNow investment
Extend ServiceNow capabilities affordably across the enterprise. Enable task creation, assignment, management, and reporting on any ServiceNow application without developer support.
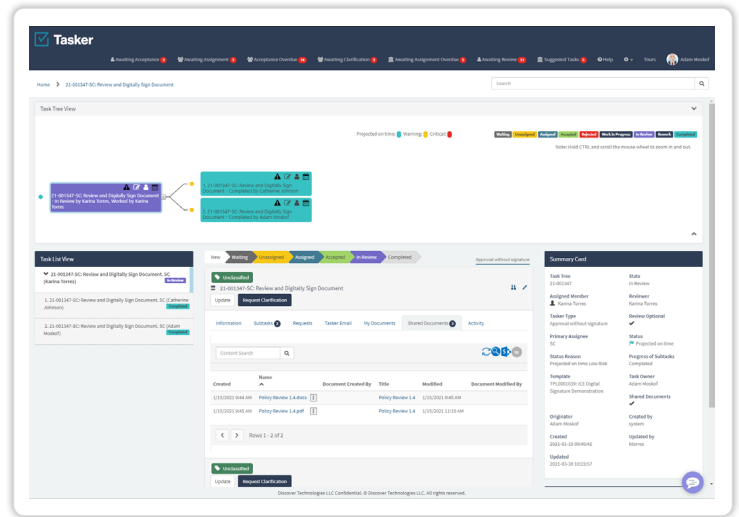

Discover increased productivity
Make work transparent and efficient with clear task assignment, due dates and priorities. Achieve better outcomes and accomplish more. Manage tasks instead of tasks managing you.

Enable and enhance collaboration
Bring chat, email, and documents all inside tasks being worked. Enable transparency among teams and across the organization. See task status and provide input while tasks are being worked. Get everyone on the same screen.

Capture organizational knowledge and best practices
Bring all tasks related to any project, request, planning effort or routine activity out of email or spreadsheets. Documenting previous tasks inside Tasker enables your organization to reuse, relate and learn best practices for any action or activity.
