

NEW! Streamlined

Responsive UI

Secure Enterprise Work Management Applications Built Exclusively for ServiceNow

Leading organizations are taking control and eliminating chaos by moving from email, spreadsheets, shared folders, and complex workflow solutions to Tasker. By eliminating the silos and gaps of an unstructured work environment, employees and business leaders unlock lost productivity and see an increased and faster return on investment from their people and systems.

Tasker 2.8 was reimagined from the ground up with task and project management best practices necessary for a new world of remote, hybrid, and on-premise work. Tasker is engineered to be the most secure and dynamic productivity platform available in cloud, hybrid and on premise environments. Tasker brings people out of email and sticky notes and into a single-screen, enabling users to track and manage productivity without exposing your organization to the security threats and risks of subscription SaaS-based productivity solutions.

Tasker WorkUI™

Manage your work easily all in one place with the Tasker WorkUI[™]. Designed with collaborative work management best practices in mind so your critical, ad-hoc, and routine work is completed regardless of location or device. Quickly find all your assigned and delegated tasks, projects, and work. Access each assignment, all attachments, approve, complete, or delegate with ease.

Reports & Dashboards

Robust and dynamic standard and custom dashboards capture the state of work being performed throughout the organization. Executives can review organizational performance while business unit and team leaders can see who is getting work done and where bottlenecks are impacting productivity. All dashboard data can be easily exported in one-click to .csv and .xlsx formats for further analysis or review.

Intuitive TaskFlow[™] Designer

Easily build complex tasks and projects using Tasker's unique TaskFlow Designer. Build and review templates in "task-tree" views. Quickly make tasks and subtasks, adjust assignments, or make ad-hoc changes on the fly to adjust for unexpected challenges or staff turnover. The flexibility and proactive features of Tasker ensure work is completed and nothing is lost when changes impact the market, business, or workforce.
