Tasker

Secure Enterprise Work Management Applications Built Exclusively for ServiceNow

Leading organizations are taking control and eliminating chaos by moving from email, spreadsheets, shared folders, and complex workflow solutions to Tasker. By eliminating the silos and gaps of an unstructured work environment, employees and business leaders unlock lost productivity and see an increased and faster return on investment from their people and systems.

Tasker 2.8 was reimagined from the ground up with task and project management best practices necessary for a new world of remote, hybrid, and on-premise work. Tasker is engineered to be the most secure and dynamic productivity platform available in cloud, hybrid and on premise environments. Tasker brings people out of email and sticky notes and into a single-screen, enabling users to track and manage productivity without exposing your organization to the security threats and risks of subscription SaaS-based productivity solutions.

NEW! Streamlined Responsive UI

Designed to maximize team and individual productivity

**Faster decisions in fewer clicks**

Mobile and Desktop UI designed to work the way people work, not spreadsheets

Built with Fast ROI and task/project management best practices in mind

**Build Simple and Complex Tasks and Projects in a few clicks**

Track progress of assignments and identify bottlenecks quickly before delays impede progress

Built for on-premise, remote, and hybrid work teams to increase productivity

Tasker

Built for Today's Enterprise Leveraging a New Generation of On-Premise, Remote, and Hybrid Teams and Staff
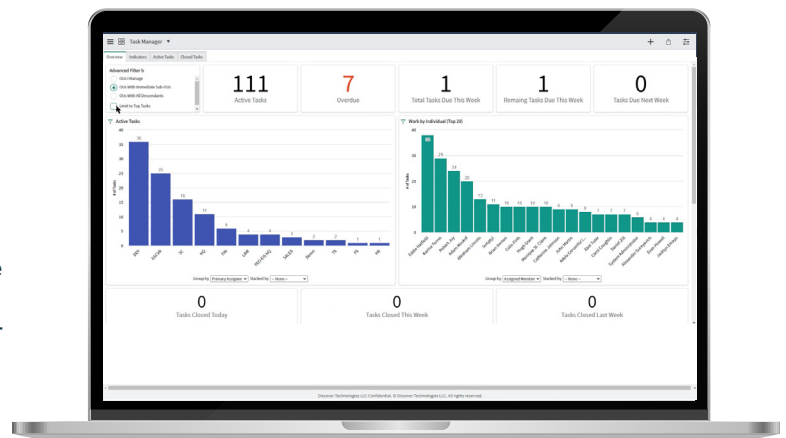

Intuitive Builder

Easily build complex tasks and projects in "task-tree views." Quickly make task and subtasks, adjust assignments, or make ad-hoc changes on the fly to adjust for unexpected challenges or staff turnover. The flexibility and proactive features of Tasker 2.8 ensure work is completed and nothing is lost when changes impact the market, business, or workforce.

Reports & Dashboards

Robust and dynamic standard and custom dashboards capture the state of work being performed throughout the organization. Executives can review organizational performance while business unit and team leaders can see who is getting work done and where bottlenecks are impacting productivity. All dashboard data can be easily exported in one-click to .csv and .xlsx formats for further analysis or review.

About DTech Apps

Discover Technologies is an 11-year-old technology services and products company focused on helping organizations through their digital transformation journey. A few years ago, Discover Technologies recognized the challenges organizations experienced in modernizing office operations to become more efficient and successful. DTech Apps by Discover Technologies was born.

DTech Apps by Discover Technologies partnered with ServiceNow, the global leader in workflow management, to develop a suite of applications to help organizations improve productivity through work management. These products enable organizations to spend more time achieving their objectives while realizing a fast return-on-investment. The result: development of The Tasker Suite, engineered to help organizations increase efficiency and discover new levels of productivity.
