Tasker

Features and Functionality

Tasker is the most secure enterprise task management solution available today. Designed to increase productivity and unlock unrealized potential, Tasker helps individual contributors, managers, organizational leaders and executives manage their daily work while making sure critical projects aren't missed. Learn how leading government agencies and enterprises are unleashing their potential with Tasker.

Unlock Your Organization's Full Potential
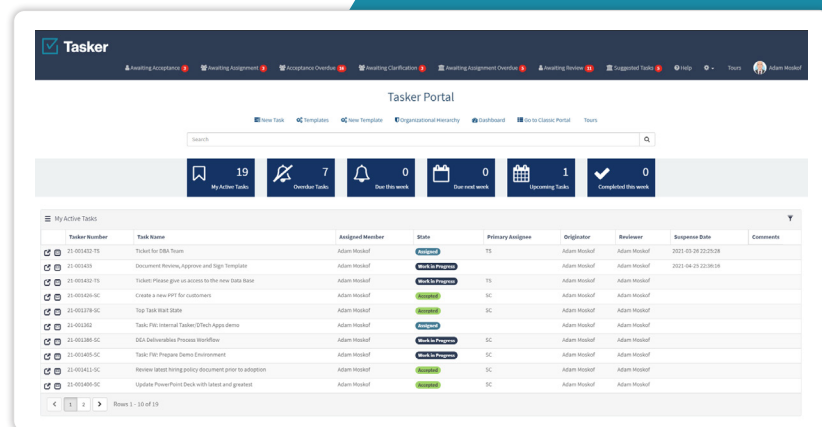

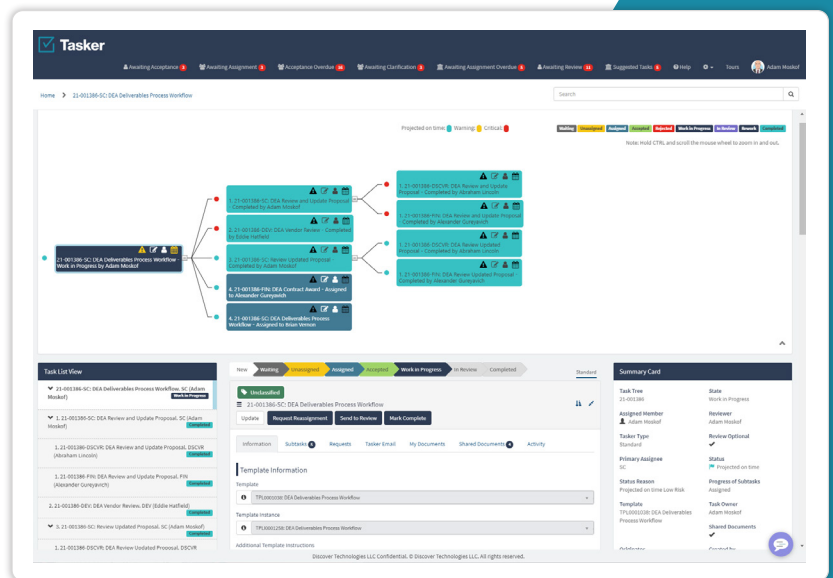

Intuitive Interface
Configure portal views and dashboards to organize work visually in real-time. Automate reports for yourself and others across your team, organization, or the entire enterprise.

Manage Work More Efficiently
Easily create, assign, delegate, route and manage tasks for any ServiceNow workflow. One-click task assignment, easy task review and approval. Automate scheduled tasks, transform and consolidate email requests, spreadsheets, and attachments into documented, trackable, and reportable tasks.
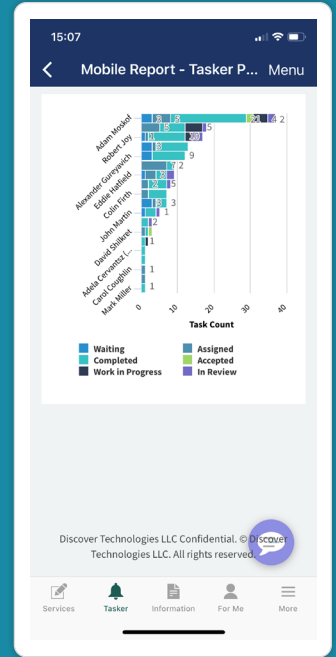

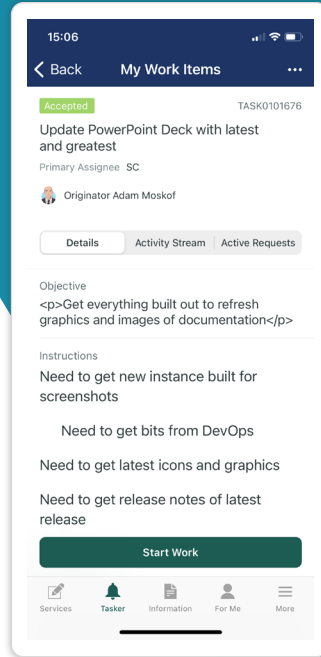

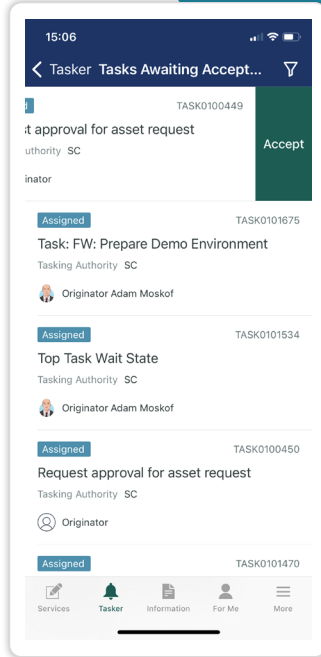

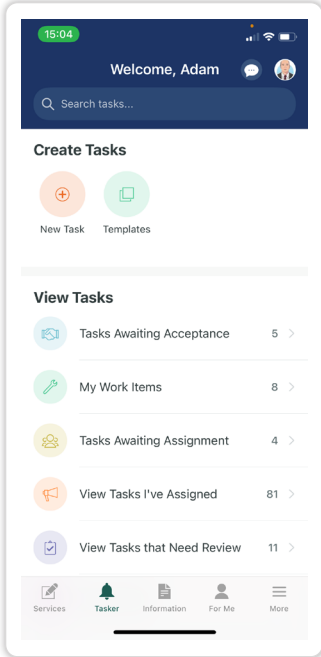

Highest Levels of Security
In a world where cybersecurity threats linger on a daily basis, government and commerical users of Tasker can rest assured knowing this solution was designed with security in mind. Through our partnership with ServiceNow all versions of Tasker have inherited FedRAMP Moderate and U.S. Department of Defense (DOD) Impact Level 5 (IL5) Provisional Authorization through the ServiceNow National Security Cloud (NSC) making Tasker the most secure work management tool available today.

Tasker

FEATURES & FUNCTIONALITY

Mobile Access

Work happens everywhere and anytime. Tasker was built to provide the same robust experience from the desktop in the palm of your hand. From task management to reporting, users at all levels in an organization can easily work smarter and faster with Tasker mobile.

Flexibility with Best Practices in Mind

Tasker is highly configurable, adapting to a multitude of organizational structures while also keeping task management best practices in mind. No matter the team, enterprise, agency or user, Tasker was built to unlock your untapped productivity.

Built on Now

Built on the ServiceNow platform, Tasker help organizations leverage and unlock their ServiceNow investment across the enterprise keeping total cost of ownership low and organizational productivity high.

Templates

Leverage simple and robust task templates or build your own. Tasker helps everday users become super users and super heroes of productivity by allowing for custom templates. Existing teams can customize and standardize work to be built just for them, and make it repeatable for the same scenario or multiple instances.

Built on **now**™
