

## Features and Functionality

Tasker is the most secure enterprise collaborative work management solution available. Engineered to increase productivity and unlock unrealized potential, Tasker helps individual contributors, managers, organizational leaders, and executives manage their daily work and critical projects. Learn how leading government agencies and enterprises are unleashing their potential with Tasker.

## Unlock Your Organization's Full Potential

### Intuitive Interface

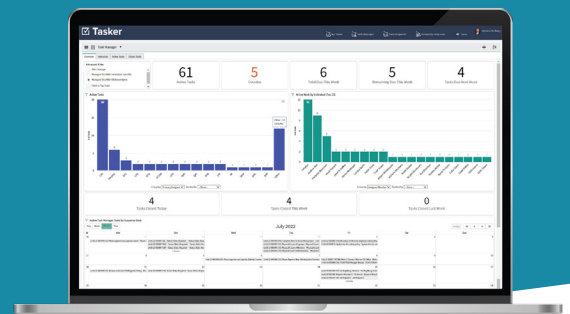

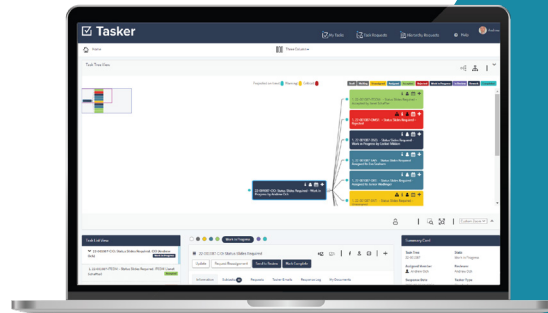

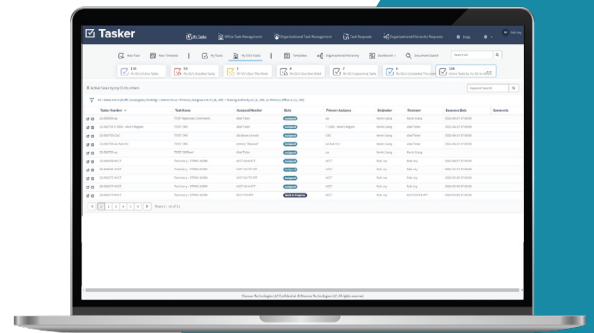

Configure portal views and dashboards to organize work visually in real-time. Automate reports for yourself and others across your team, organization, or the entire enterprise.

### Manage Work More Efficiently

Easily create, assign, delegate, route, and manage tasks for any ServiceNow workflow. Assign tasks in one-click, and easily review and approve existing tasks. Automate scheduled tasks, transform and consolidate email requests, spreadsheets, and attachments into documented, trackable, and reportable tasks.

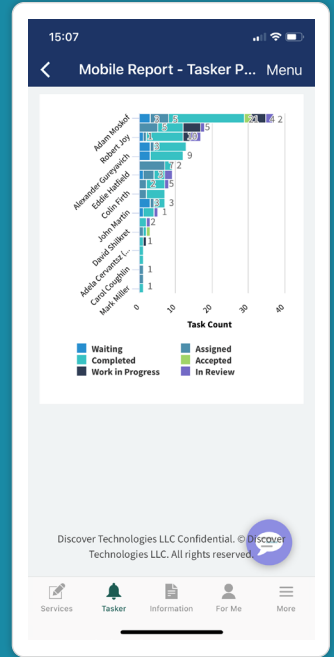

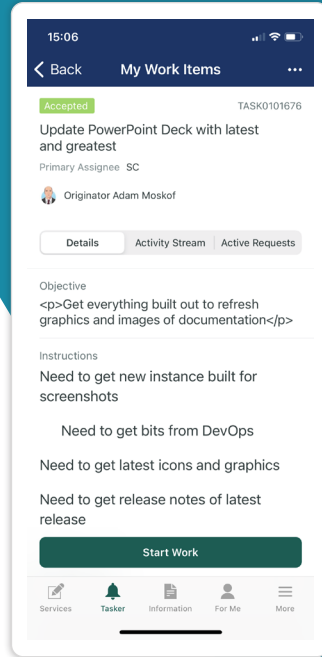

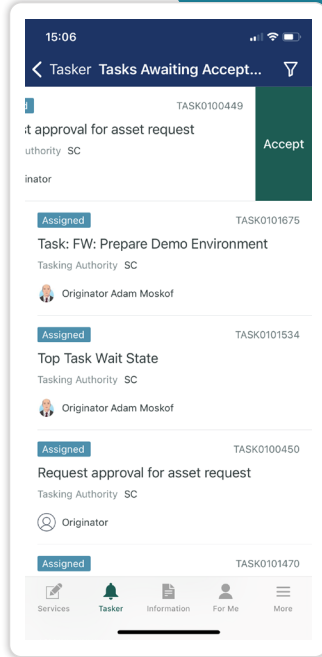

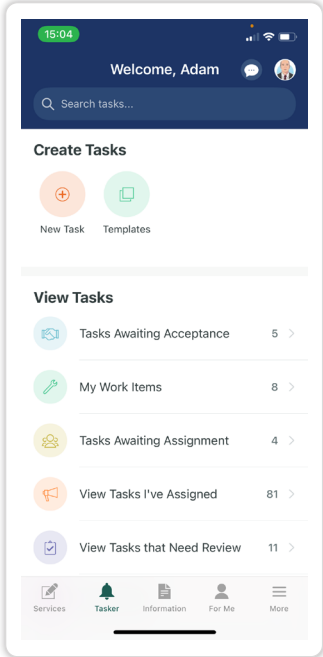

### Highest Levels of Security

In a world where cybersecurity threats linger on a daily basis, government and commercial users of Tasker can rest assured knowing this solution was designed with security in mind. Through our partnership with ServiceNow, all versions of Tasker have inherited FedRAMP High and U.S. Department of Defense (DOD) Impact Level 5 (IL5) Provisional Authorization through the ServiceNow National Security Cloud (NSC), making Tasker the most secure work management tool available today.

## FEATURES & FUNCTIONALITY

### Mobile Access

Work happens everywhere and anytime. Tasker mobile was engineered to provide the same robust desktop experience in the palm of your hand. From task management to reporting, users at all levels in an organization can easily work smarter and faster with Tasker mobile.

### Flexibility with Best Practices in Mind

Tasker is highly configurable, adapting to a multitude of organizational structures while also keeping collaborative work management best practices in mind. No matter the team, enterprise, agency, or user, Tasker unlocks hidden productivity.

### DTech Apps + ServiceNow

Built on the ServiceNow platform, Tasker helps organizations leverage and unlock their ServiceNow investment across the enterprise, keeping total cost of ownership low and organizational productivity high.

### Templates

Leverage simple and robust task templates or build your own. Tasker enables everyday users become super users and super heroes of productivity by allowing for custom templates. Existing teams can customize and standardize work to be built just for them, and make it repeatable for various scenarios or multiple instances.
