

# Cybersecurity Operations

**Record, Track, Manage, and Review All Cybersecurity Processes and Procedures with a Comprehensive Audit Trail**

Cybersecurity requires a constant monitoring of systems, applications, and networks. Building routine repeatable processes that can provide an audit trail of everything from patch management to vulnerability management and assessment documentation is critical to repel threats and maintain a secure organization. Security leaders and teams need to quickly build processes, replicate them into templates, and add ad-hoc requests, tasks, or processes quickly. Waiting months for solutions to be programmed and implemented doesn't work in the demanding world of cybersecurity. Security leaders and professionals need a tool that requires no coding and empowers everyone. They need Tasker built on ServiceNow.

Tasker is a collaborative work management platform that moves teams and leaders from email, spreadsheets, shared folders, and complex workflow solutions into a secure, structured work environment that unlocks productivity and bridges the gaps between silos and disparate systems. Tasker's streamlined and responsive WorkUI™ and TaskFlow™ Builder enable users to easily create, assign, delegate, route, and manage work. Cybersecurity teams across North America leverage Tasker to ensure they are managing a safe and secure organization.

U.S. Department of Defense  
**IL5 IMPACT LEVEL 5**

## Tasker

- Secure, highly configurable collaborative work management on ServiceNow
- Assign simple or complex work/tasks/projects and increase leadership visibility
- View and monitor work in real-time from desktop or mobile

## DocIntegrator

- Create, collaborate, and review secure SharePoint documents without ever leaving ServiceNow or Tasker
- Robust SharePoint search capability
- One-click PDF eSignature
- Seamless integration with ServiceNow

# Tasker

**Built for dynamic Cybersecurity teams leading the fight by eliminating threats and vulnerabilities**

## WorkUI™

Manage your work easily all in one place with the Tasker WorkUI™. Designed with collaborative work management best practices in mind so your critical, ad-hoc, and routine work is completed regardless of location or device. Quickly find all your assigned and delegated tasks, projects, and work. Access each assignment and all attachments, approve, complete, or delegate with ease.

## Reports & Dashboards

Robust and dynamic standard and custom dashboards capture the state of work being performed throughout the organization. Executives can review organizational performance while business unit and team leaders can see who is getting work done and where bottlenecks are impacting productivity. All dashboard data can be easily exported in one-click to .csv and .xlsx formats for further analysis or review.

## Intuitive TaskFlow™ Builder

Easily build complex tasks and projects using Tasker's unique TaskFlow Builder. Build and review templates in "task-tree views." Quickly make tasks and subtasks, adjust assignments, or make ad-hoc changes on the fly to adjust for unexpected challenges or staff turnover. The flexibility and proactive features of Tasker ensure work is completed and nothing is lost when changes impact the market, business, or workforce.
